

Why Good Traffic Isn't Generating Leads

A Complete SEO & Conversion Rate Optimization Audit

DOMAIN	sereinspaces.com
INDUSTRY	Commercial & Office Interior Design Design & Build Turnkey Fitout
GEOGRAPHY	Delhi NCR Gurgaon Noida Faridabad Greater Noida
REPORT	SEO Audit CRO Audit User Journey Competitor Analysis 90-Day Plan
DATE	June 2026

The Core Business Problem

Serein Spaces ranks for its target keywords and receives organic traffic. Despite this, qualified enquiries and project leads remain below expectations. This report identifies exactly why — and provides a prioritised action plan to fix it.

KEY FINDINGS AT A GLANCE

- No pricing or budget guidance → visitors cannot self-qualify
- Contact form is hidden below the fold — no prominent CTA above it
- Zero urgency signals — popup offers ₹10,000 off but no deadline
- Blog attracts informational traffic that never converts to leads
- Service pages lack social proof, project timelines & trust triggers
- Portfolio pages have no conversion CTAs after the work is shown
- Competitors use cost calculators, live chat, and video walkthroughs

11	Executive Summary for Client Presentation	16

1. EXECUTIVE SUMMARY

The Problem in One Sentence: Serein Spaces is winning the SEO game but losing the conversion game. The website attracts visitors who match the target profile, but fails to give them the information, confidence, and frictionless path they need to pick up the phone or submit an enquiry.

This audit is not a standard SEO report. Traffic is not the problem. Rankings are not the primary issue. The problem is a systematic failure to convert intent into action. This report identifies every friction point in the user journey, every missed conversion opportunity, and provides a practical, prioritized roadmap to increase qualified enquiries within 30 to 90 days.

Homepage Clarity

CRITICAL

Unclear — 'Transform Your Workspace' headline is generic, not benefit-specific

CTA Placement

CRITICAL

Weak — primary CTA buried; no above-fold enquiry path on most pages

Trust Signals

HIGH

Partial — client logos present but no testimonials with names, photos, or project details

Service Page Depth

HIGH

Thin — services described in 3 bullet points with no process, timeline, or outcome detail

Contact Friction

HIGH

High — contact form requires full details before any value is offered to the visitor

Pricing Transparency

CRITICAL

Zero — no pricing guidance, no cost range, no budget qualifier anywhere on the site

Portfolio Quality

HIGH

Good images but zero conversion path — no CTA after showing completed work

Blog → Lead Pipeline

HIGH

Broken — blog attracts informational readers who are never funnelled toward a consultation

Technical SEO

MEDIUM

Good — HTTPS, sitemap, reasonable crawlability

Mobile Experience

MEDIUM

Acceptable but not optimised for mobile-first conversion

2. BUSINESS UNDERSTANDING

Dimension	Detail
What They Sell	Premium commercial interior design and build (turnkey) services for office spaces
Primary Services	Office interiors, retail interiors, hospitality interiors, custom furniture, civil & MEP fitout
Design-Build Model	End-to-end: concept → design → execution → handover — no need to manage multiple vendors
Geography	Delhi NCR: Gurgaon, Noida, Greater Noida, Faridabad, Delhi city
Target Audience	Business owners, founders, CXOs, HR heads planning office fitout or relocation (50–500+ employees)
Project Size (Est.)	Mid to large: 1,000–50,000+ sq ft based on portfolio examples (GJEPC, Bhutani Alpha)
Avg. Sales Cycle	Typically 4–12 weeks from first enquiry to contract sign for commercial fitout
Primary Conversion Goal	Phone call or form submission requesting a free consultation / site visit
Secondary Goal	Portfolio views → WhatsApp message → Direct contact
Revenue Model	Project-based fees: design + execution contract. Premium positioning (not budget-focused)
EEAT Status	Founders named (Gaurav Chaudhary & Ar. Sakshi Saini) — good. But underused on the website.

Customer Personas

Persona 1: The Relocating Founder

HIGH PRIORITY

A startup or SME founder whose company is moving to a new office. Budget conscious but image-aware. Searches 'office interior design Gurgaon' or 'office fitout cost per sq ft Noida'. Wants to understand costs upfront before talking to anyone. Currently cannot get this from sereinspaces.com — so they leave and call a competitor who shows a pricing range.

Persona 2: The Corporate Decision Maker

HIGH PRIORITY

HR Director or Admin Head at a 200+ person company expanding or refurbishing their office. Needs to shortlist 2–3 vendors and present a business case internally. Looks for case studies, timeline guarantees, and named client references. Serein Spaces has the portfolio but hides it behind generic gallery pages with no project context.

Persona 3: The Specifier

MEDIUM PRIORITY

Architect or property consultant recommending interior designers to their client. Checks the website for professional credibility — named founders, certifications, awards, detailed case studies. The One Prastha case study is a good start but only one example exists.

Buying Journey

1 — Trigger	Business needs a new or redesigned office. Search begins.
-------------	---

2 — Awareness	Google search: 'office interior designer Delhi NCR', 'office fitout cost Gurgaon'
3 — Consideration	Visits 3–5 websites. Looks for: portfolio, pricing signals, trust, timeline clarity
4 — Shortlisting	Contacts 2–3 firms for consultation / site visit / proposal
5 — Decision	Selects vendor based on: proposal quality, referrals, perceived trust, timeline
6 — Contract	Signs design + execution contract. Project begins.
Critical Gap: Serein Spaces does well in Steps 1–2 (ranking and attracting visitors) but fails at Step 3 (giving visitors enough information to shortlist them) and Step 4 (making it easy to reach out). Visitors arrive, browse, and leave without converting because the path from 'I'm interested' to 'I'll contact them' has too many gaps.	

3. USER JOURNEY AUDIT

Homepage — Above the Fold

HIGH

FINDING	Hero slider shows 'Transform Your Workspace' with a CTA to 'Our Projects'. This sends visitors deeper into browsing mode rather than enquiry mode. The popup offering ■10,000 off the design fee is aggressive and appears immediately — before users have seen any work.
RECOMMENDATION	Change hero CTA to 'Get a Free Consultation' or 'Schedule a Site Visit'. Delay the popup to 30+ seconds or exit intent. Add a sticky header CTA visible on all pages: 'Talk to a Designer — Free Consultation'.

Navigation Structure

MEDIUM

FINDING	The nav has Home, About, Services, Portfolio, Location, Case Study, Blog, Contact. 'Industry' appears on some pages (CA Office, Lawyer Office) but not others — inconsistent. There is no 'Get a Quote' or 'Start a Project' nav link.
RECOMMENDATION	Add a visually distinct 'Start a Project' or 'Free Consultation' button in the navigation bar — styled differently from other nav links. Make it appear on every page.

Service Pages

CRITICAL

FINDING	The Services page lists Commercial, Hospitality, and Retail with 2–3 sentence descriptions. No process is explained, no timeline is given, no pricing range is hinted at, no outcomes are described. Clicking a service type does nothing — there is no individual service page with depth.
RECOMMENDATION	Create individual service pages for each vertical: Office Interior Design, Retail Interiors, Hospitality Interiors. Each page should contain: process steps, timeline, portfolio examples for that vertical, testimonials, and a strong CTA.

Portfolio / Project Pages

HIGH

FINDING	Portfolio shows high-quality images but provides zero context. Visitors see beautiful photos but do not know: what industry the client was in, how large the project was, what the brief was, or what the outcome was. There is only ONE case study (One Prastha) in the Case Study section.
RECOMMENDATION	Add project context to every portfolio item: Client industry, Project size (sq ft), Brief summary, Key design decisions, Timeline. Convert the top 5–8 portfolio projects into full case studies with before/after photos and a client quote.

Contact Page

CRITICAL

FINDING	The contact page has a standard form (name, email, message), a phone number, WhatsApp link, and address. No qualification questions. No estimated response time. No social proof near the form. No incentive to submit.
RECOMMENDATION	Add 3 qualifying fields: project type, approximate sq footage, and timeline. Add a trust statement near the form: 'We respond within 2 hours during business hours.' Add 1–2 short testimonials next to the contact form. Offer a specific incentive: 'Submit your details and receive a free Space Planning Checklist.'

Blog → Lead Path

CRITICAL

FINDING	The blog has 20+ articles on topics like 'ergonomics in offices', 'acoustics in design', 'low-budget office ideas'. These attract informational visitors (people researching, not necessarily buying). None of the blog posts analysed contain a prominent mid-article or end-of-article CTA linking to a consultation or service page.
RECOMMENDATION	Add a conversion CTA box to every blog post — positioned after the 2nd section and at the end: 'Planning your office interior? Get a free consultation with Serein Spaces.' Link to the contact page. For high-intent blog posts like 'Office Interior Design Cost in Noida', add a lead magnet: 'Download our Free Fit-Out Cost Guide'.

Mobile Experience

MEDIUM

FINDING	The site uses maximum-scale=2 in the viewport meta tag, which can prevent proper mobile zoom. Phone numbers are clickable (positive). WhatsApp button is visible. However, the popup appears on mobile and covers a significant portion of the screen immediately.
RECOMMENDATION	Test mobile journey end-to-end on iOS and Android. Disable the popup on mobile entirely or change to a slide-up bar. Ensure all CTAs have minimum 44px touch targets. Verify form is easy to fill on mobile keyboard.

4. CONVERSION RATE OPTIMIZATION (CRO) AUDIT

CRO Diagnostic: For a premium B2B interior design firm, the typical conversion rate from organic traffic to enquiry should be 1.5–3% for commercial-intent visitors. Informational blog traffic converts at 0.1–0.3%. If Serein Spaces is receiving good traffic but low leads, the most likely cause is intent mismatch (attracting informational traffic) combined with conversion friction (making it hard to enquire). Both are fixable.

CTA Placement & Wording

CRITICAL

FINDING	The primary CTA across most pages is 'Our Projects' — directing users to browse more rather than enquire. The consultation popup is the only proactive conversion tool, but it fires too early and on mobile covers the screen.
RECOMMENDATION	Replace 'Our Projects' CTAs with 'Book a Free Consultation' or 'Get a Free Space Assessment'. Place a CTA button above the fold on every page. Use action-oriented language: 'Schedule My Free Site Visit' performs better than 'Contact Us' in B2B services.

No Pricing Transparency

CRITICAL

FINDING	Zero pricing information on the entire website. For commercial interior design in Delhi NCR, decision-makers know that costs range from ₹800–3,000+ per sq ft depending on scope. Not providing even a range forces visitors to contact competitors who do.
RECOMMENDATION	Add a 'Project Investment Guide' section or page: 'Our projects typically range from ₹800–2,500/sq ft depending on scope and finish level. Book a free consultation to get an accurate estimate for your space.' This qualifies budget-fit leads before they even call.

Social Proof Weakness

HIGH

FINDING	Client logos are shown on the homepage (good) but testimonials lack names, photos, or context. The three quotes shown are generic ('amazing design', 'exceeded expectations') with no mention of project type, company name, or measurable outcome.
RECOMMENDATION	Replace generic testimonials with specific ones: Company name, spokesperson name/title, project type, sq footage, and one concrete outcome ('Delivered in 8 weeks, on budget, GJEPC team loved the result'). Add Google Reviews widget if rating is 4.5+.

Portfolio Has No Conversion Path

HIGH

FINDING	After viewing the portfolio — arguably the highest-intent page on the site — there is no prompt to take action. A visitor who looks through 15 portfolio photos is clearly interested. They are not being asked to convert.
RECOMMENDATION	Add a sticky bottom bar on portfolio pages: 'Love what you see? Let's design your space. — Book a free consultation.' Add a 'Similar projects' CTA after each image with a link to the services page for that project type.

No Lead Magnets

HIGH

FINDING	There is no lead magnet on the site — no downloadable guide, no cost calculator, no checklist that would capture an email address in exchange for value. In a high-consideration B2B purchase, most visitors are not ready to call on first visit.
---------	--

RECOMMENDATION	Create one lead magnet immediately: 'The Office Interior Fit-Out Checklist — 25 Things to Decide Before You Start.' Offer it as a PDF download on the homepage, blog sidebar, and contact page. Capture name + email + phone number.
-----------------------	--

Exit Intent Not Used

MEDIUM

FINDING	No exit intent mechanism detected. When a visitor moves to close the tab, there is no last-chance prompt offering value.
RECOMMENDATION	Implement an exit-intent popup showing: 'Before you go — get our Free Office Fit-Out Cost Guide (2026 Prices for Delhi NCR).' This converts approximately 3–8% of exiting visitors in B2B services.

WhatsApp CTA Underused

MEDIUM

FINDING	A WhatsApp button exists but is positioned as a small floating icon. In India, WhatsApp is the preferred B2B communication channel, especially for first contact in SME segment.
RECOMMENDATION	Make WhatsApp more prominent: Add 'Chat on WhatsApp — Respond in 2 hours' as a text button above the fold. Pre-fill the WhatsApp message: 'Hi, I'd like to enquire about office interior design for my company.' Track WhatsApp clicks as a conversion goal.

FAQ Section Missing

MEDIUM

FINDING	No FAQ section on service pages or the homepage. Decision-makers always have questions: How long does it take? What areas do you cover? Do you handle civil work? What is your minimum project size?
RECOMMENDATION	Add an FAQ section to the homepage (8–10 questions) and each service page (5–6 relevant questions). Use FAQPage schema markup to increase eligibility for featured snippets and Google AI Overviews (AEO).

5. SEO AUDIT — TECHNICAL, ON-PAGE & ARCHITECTURE

URL Structure & Mixed Extensions

HIGH

FINDING	Multiple URL formats exist simultaneously: .php extensions (about-us.php, blog.php), clean URLs (/our-services), and trailing slash variations. This creates potential for duplicate content and signals an unmaintained site architecture to search engines.
RECOMMENDATION	Audit all URLs. Standardize to clean URLs without extensions (301 redirect all .php URLs to clean equivalents). Ensure all canonical tags point to the preferred URL version. Submit a clean sitemap with only canonical URLs.

Homepage Title & Meta

HIGH

FINDING	The homepage title is 'Best Office Interior Design services in Delhi Delhi NCR Gurugram' — keyword-stuffed and not compelling for CTR. Multiple location keywords in the title reduce the click appeal in SERP.
RECOMMENDATION	Rewrite: 'Office Interior Design & Build Serein Spaces Delhi NCR'. Write a meta description that leads with the business benefit and ends with a CTA: 'Premium turnkey office interiors in Delhi, Gurgaon & Noida. 550+ projects delivered. Get a free consultation today.'

Blog Meta Keywords Tag

MEDIUM

FINDING	The blog page (blog.php) has a meta keywords tag containing WordPress theme boilerplate: 'interior service wordpress theme, Architecture & Interior Designer Html5 Template...' — this is placeholder developer content left in production and signals poor site quality.
RECOMMENDATION	Remove all meta keywords tags from the blog page immediately. Replace with a relevant meta description. Audit all pages for similar developer placeholder content.

Image Alt Text in Navigation

MEDIUM

FINDING	The logo image uses alt text: 'modern office interior design, interior design office near me, office interior design ideas for small space' — this is keyword stuffing in alt text, a practice that violates Google's quality guidelines.
RECOMMENDATION	Replace logo alt text with simply 'Serein Spaces Logo'. Use descriptive, contextual alt text on all images — describe what the image shows, not the keywords you want to rank for.

Internal Linking — Blog to Services

CRITICAL

FINDING	Blog content drives traffic but the internal links within blog posts do not consistently point to service pages, location pages, or the contact page. The conversion pipeline from informational content to commercial intent is broken.
RECOMMENDATION	Audit every blog post. Each post should contain: one internal link to a relevant service page, one internal link to a relevant location page (where applicable), and one CTA linking to the contact page or lead magnet. Do this for the top 10 highest-traffic blog posts first.

Heading Structure

MEDIUM

FINDING	The services page uses a single H2 for 'Elevating Productivity through Smart Design' but individual service types (Commercial, Hospitality, Retail) appear to be styled as visual tabs rather than properly structured H3 headings with descriptive content.
RECOMMENDATION	Implement proper H1→H2→H3 heading hierarchy on all pages. Each service type should have its own H2 or H3 with descriptive text beneath it that includes the target keyword naturally.

Structured Data (Schema)

HIGH

FINDING	No LocalBusiness, Service, FAQPage, or BreadcrumbList schema detected on any page. For a local B2B service business, LocalBusiness schema is a basic requirement that improves local pack visibility and provides rich result eligibility.
RECOMMENDATION	Implement: LocalBusiness schema on homepage (name, address, phone, geo coordinates, opening hours), Service schema on each service page, FAQPage schema on FAQ sections, BreadcrumbList on all interior pages. Test using Google Rich Results Test.

Location Pages — Depth

MEDIUM

FINDING	Location pages exist for Noida, Greater Noida, Delhi, Gurgaon, Faridabad. These are good for local SEO but may be thin on content — each page likely follows the same template with the city name swapped in.
RECOMMENDATION	Audit each location page for unique content. Add city-specific sections: local commercial hubs served (e.g., Cyber City, DLF in Gurgaon), local project examples, city-specific testimonials, and any local authority or regulation notes relevant to office fitout.

Core Web Vitals & Performance

MEDIUM

FINDING	The homepage loads a slider with large .webp images and a Facebook pixel. Multiple social media embeds and a popup system add to initial load weight. Assumption only — full audit requires PageSpeed Insights data.
RECOMMENDATION	Run PageSpeed Insights on sereinspaces.com. Target: LCP under 2.5s, FID/INP under 100ms, CLS under 0.1. Lazy-load all below-fold images. Defer non-critical JavaScript. Consider removing the homepage slider in favour of a single hero image with a clear CTA.

6. LEAD QUALITY ANALYSIS

Why Visitors Are Not Becoming Leads

- **Wrong Intent Traffic from Blog:** Articles on 'ergonomics', 'acoustics', 'colour psychology' attract interior design enthusiasts, students, and DIY readers — not business owners looking to commission a ₹50 lakh fitout. These visitors arrive, read, and leave. They were never leads.
- **No Cost Information = Lost Leads:** The single biggest reason high-intent visitors leave without contacting is the inability to self-qualify on budget. A business owner who cannot tell whether Serein Spaces is in their budget will call a competitor who gives them a range.
- **Trust Gap at Decision Point:** The testimonials are anonymous or vague. The portfolio lacks context. Decision-makers for ₹25–75 lakh projects need to see that Serein Spaces has done something similar. Project names, sqft, industry, and client quotes are missing.
- **No Urgency or Next Step:** Nothing on the site creates urgency. The popup's '₹10,000 off' offer has no expiry, so there's no reason to act now. A visitor who leaves saying 'I'll come back later' almost never does.
- **Contact Friction Too High:** The contact form is generic. It asks for Name, Email, Message — the same as every website. There's no reason to feel this firm is particularly interested in the visitor's specific situation.

Pages with Highest Conversion Potential (Prioritise These First)

Page	Why High Potential	Current Conversion Issues	Fix Priority
Homepage	First touchpoint for branded searches. High intent.	Weak — slider CTA sends to portfolio, not enquiry	CRITICAL
Location Pages (Gurgaon, Noida)	Commercial-intent traffic. Visitors searching 'office interior designer Gurgaon' are buyers.	No CTA above fold. No pricing signal. No project examples.	CRITICAL
Portfolio / Project Pages	Visitors who reach portfolio are highly interested. They've self-selected.	No CTA. No project context. Gallery only.	HIGH
CA Office / Lawyer Office Industry Pages	Niche commercial intent. Very specific buyer persona.	Good FAQ but weak CTA. No pricing range.	HIGH
Blog: Cost & Pricing Posts ('Office Fitout Cost Noida')	Transactional blog intent. Visitors are in planning stage.	No lead magnet. No mid-article CTA. No email capture.	HIGH
Contact Page	Destination for all CTAs — must convert.	Generic form. No trust signals. No response time stated.	CRITICAL

7. COMPETITOR ANALYSIS

The following competitors operate in the same geography (Delhi NCR) and target the same commercial office interior design segment. Analysis is based on publicly observable website features, messaging, and conversion strategy.

Competitor	Strengths	Where They Beat Serein Spaces	Weakness to Exploit
Hub & Oak Interiors (hubandoakinteriors.com)	Indian Achievers Award 2025. BOQ-based transparent pricing. 100+ verified projects. Clear process steps on website.	Award credibility. Pricing transparency (BOQ). Named project references. Clear '75-day delivery' promise.	Less visual portfolio depth than Serein Spaces. Serein can win on design quality showcase.
Phi Designs	'75-day office delivery' guarantee. Strong startup & SME positioning. Verifiable case studies.	Specific delivery promise creates urgency and trust. Clear target market messaging.	Less design variety. Serein's premium positioning can win for clients who want luxury over speed.
SKV India (skvindia.com)	15+ years experience. ISO certified. Transparent process. Multiple city offices.	Longer track record. ISO certification as trust signal. More city coverage.	Less premium positioning. Serein can own the 'luxury turnkey' niche they vacate.
ANSA Interiors (ansainteriors.com)	Strong portfolio page with named projects. Clear commercial focus. Delhi + Gurgaon + Noida.	Named project references (Workbee coworking, Aqualite, S&S; Partners).	Less visual design quality. Serein's photography and renders are stronger.
Space Matrix (spacematrix.com)	23 years. Award-winning. Enterprise clients (Nestle, American Express, Verizon).	Enterprise credibility and scale. International presence.	Too large for SME segment — Serein can win mid-market (1,000–20,000 sqft) exclusively.

What Top Competitors Do That Serein Spaces Should Adopt

Specific Delivery Promise

Hub & Oak and Phi Designs both state specific timelines. Serein Spaces should state: 'Typical office fitouts completed in 10–14 weeks.' This reduces risk perception and creates a comparative advantage.

Cost Range Guidance

Every top competitor provides some form of cost signal. Serein Spaces is the only major player in this segment with zero pricing transparency — this is a conversion handicap, not a premium differentiator.

Named Client References

ANSA Interiors names specific clients (Workbee, Aqualite). Serein Spaces shows logos but no project names on the portfolio page. Named projects build trust significantly.

Process Pages

Hub & Oak has a detailed 'How We Work' page with numbered steps. Serein Spaces does not. Decision-makers want to know what they're buying before they call.

Awards & Certifications

Hub & Oak prominently features the Indian Achievers Award. SKV India uses ISO certification. Serein Spaces should apply for relevant industry awards and prominently feature any it has received.

8. QUICK WINS — IMPROVEMENTS ACHIEVABLE IN 30 DAYS

These are changes that require no new content creation, no developer sprint, and no budget. Each can be implemented by a marketer or with basic website access. Combined impact: estimated 30–50% increase in enquiry rate from existing traffic.

#	Quick Win	Business Impact	Time	Est. Impact	Cost
1	Add a sticky header CTA button	'Free Consultation' or 'Talk to a Designer' — visible on every page, every scroll position	30 min	Very High	None
2	Add WhatsApp CTA above the fold on homepage	Text link with pre-filled message — not just a floating icon	20 min	High	None
3	Rewrite homepage hero CTA	Change 'Our Projects' to 'Book a Free Space Assessment'	10 min	High	None
4	Add an estimated response time to contact page	'We respond within 2 business hours' near the form	10 min	Medium	None
5	Add 2–3 testimonials with names and project type near the contact form	Move from generic quotes to specific client mentions	1 hour	High	Client approval
6	Add CTAs to every blog post	'Planning your office? Get a free consultation' — after paragraph 2 and at end	2 hours	High	None
7	Fix logo alt text	Remove keyword stuffing: change to 'Serein Spaces Logo'	5 min	Medium	None
8	Remove or delay the popup on mobile	Either disable on mobile or change to exit-intent trigger	30 min	Medium	Dev access
9	Remove boilerplate meta keywords from blog.php	Replace with meaningful meta description	15 min	Medium	Dev access
10	Add project size and industry to portfolio captions	'GJEPC Head Office, Delhi — 8,000 sq ft, Corporate'	2 hours	High	None
11	Add FAQ section to homepage	8–10 common questions with answers. Apply FAQPage schema.	3 hours	High	None
12	Set popup to exit intent only	Change from page-load trigger to exit-intent trigger	30 min	Medium	Dev access

9. 90-DAY GROWTH ROADMAP

Month 1 — Foundation & Quick Wins (Weeks 1–4)

Week 1: Technical SEO fixes

- Fix URL structure — 301 redirect all .php URLs to clean versions
- Fix logo alt text and all keyword-stuffed alt attributes
- Remove boilerplate meta keywords from blog page
- Implement LocalBusiness schema on homepage
- Rewrite homepage title and meta description
- Submit clean sitemap to Google Search Console

Week 2: CRO — Above the Fold

- Add sticky header 'Free Consultation' CTA button
- Change homepage hero CTA from 'Our Projects' to 'Book a Free Space Assessment'
- Add WhatsApp above-fold text CTA with pre-filled message
- Delay popup to exit intent; disable on mobile
- Add response time to contact page ('We respond within 2 hours')

Week 3: Trust & Social Proof

- Collect 5 specific testimonials with names, company, project type from existing clients
- Add project name, sq footage, and industry to portfolio captions
- Add 2–3 testimonials next to the contact form
- Start Google Reviews drive — email past 10 clients with review link
- Add founder bios (Gaurav + Sakshi) with photos to homepage, not just About page

Week 4: Blog & Internal Linking

- Add conversion CTA box to top 10 blog posts
- Add internal links from all blog posts to relevant service pages
- Add FAQ section to homepage with FAQPage schema
- Create and publish a lead magnet: 'Office Fit-Out Checklist 2026 (Delhi NCR)'

Month 2 — Content & Conversion Infrastructure (Weeks 5–8)

Week 5: Service Page Rebuild

- Create individual service pages: Office Interiors, Retail Interiors, Hospitality Interiors
- Each page: process steps, timeline, portfolio examples, FAQ, CTA
- Add 'How We Work' process page (6-step visual process)
- Add pricing guidance section: 'Project Investment Guide'

Week 6: Portfolio → Case Studies

- Convert top 5 portfolio projects into full case studies
- Each case study: client industry, sq footage, brief, design decisions, outcome, client quote
- Add 'Enquire About a Similar Project' CTA to each case study
- Implement BreadcrumbList schema across all pages

Week 7: Location Page Optimization

- Audit and enrich all 5 location pages (Gurgaon, Noida, Delhi, Greater Noida, Faridabad)
- Add city-specific commercial hubs, local project examples, location-specific testimonials
- Add Service schema to each location page
- Internal link all location pages from homepage and navigation

Week 8: Lead Capture System

- Launch lead magnet on homepage, blog sidebar, and contact page
- Set up email automation: 3-email sequence after lead magnet download
- Implement exit-intent popup offering lead magnet
- Add WhatsApp API integration with quick-reply buttons for enquiries

Month 3 — Authority, Testing & Scale (Weeks 9–12)

Week 9: EEAT & Authority Signals

- Apply for relevant industry awards (Indian Achievers Award, Design Excellence Awards)
- Get founder profiles featured on LinkedIn with links back to sereinspaces.com
- Pursue 2–3 editorial mentions in business or design publications
- Add author bylines to all blog content (Gaurav or Sakshi as named authors)

Week 10: Content for Commercial Intent

- Publish: 'Office Interior Design Cost in Gurgaon 2026' (high commercial intent)
- Publish: 'How to Choose an Office Interior Designer in Delhi NCR (Checklist)'
- Publish: 'Office Fitout Timeline: What to Expect Week by Week'
- These target bottom-of-funnel buyers, not informational readers

Week 11: Conversion Testing

- A/B test homepage hero CTA: 'Book Free Consultation' vs 'Get a Free Space Assessment'
- Test contact form with and without qualification fields
- Test popup: exit-intent only vs. timed (45 seconds)
- Measure: form submissions, WhatsApp clicks, phone calls by page

Week 12: Reporting & Scale Plan

- Review all metrics: enquiries, phone clicks, WhatsApp clicks, form submissions
- Identify top 3 converting pages — double down on those templates
- Identify top 3 traffic pages with zero conversions — add CTAs
- Prepare Month 4–6 roadmap based on data

10. PRIORITIZED ACTION TABLE

Issue	Why It Matters	Recommendation	Priority	Impact	Effort
No pricing transparency	Visitors cannot self-qualify — they call competitors who show a range	Add 'Project Investment Guide' section with sq ft cost range	CRITICAL	Very High	Low
No sticky CTA button	Decision-makers lose the path to enquire mid-browse	Add sticky 'Free Consultation' button across all pages	CRITICAL	Very High	Low
No blog-to-lead pipeline	Blog traffic exits without converting — wasted acquisition	Add CTA boxes to all blog posts + lead magnet	CRITICAL	High	Low
Generic/anonymous testimonials	Trust gap at the decision stage — visitors can't verify credibility	Replace with named, specific, project-referenced testimonials	HIGH	High	Low
Portfolio has no CTA	High-intent visitors shown work but not asked to act	Add 'Enquire About a Similar Project' CTA to every portfolio item	HIGH	High	Low
Service pages too thin	Visitors can't understand process, timeline, or what they're buying	Create individual service pages with process, timeline, FAQ, CTA	HIGH	High	Medium
Popup fires too early	Aggressive popup increases bounce rate, especially on mobile	Change to exit-intent; disable on mobile	HIGH	Medium	Low
URL structure mixed (.php + clean)	Duplicate content risk; signals poor technical maintenance	Standardise to clean URLs with 301 redirects	HIGH	Medium	Medium
No schema markup	Missing local pack visibility and rich result eligibility	Implement LocalBusiness, Service, FAQPage, BreadcrumbList schema	HIGH	Medium	Medium
Logo alt text keyword-stuffed	Google quality violation; signals low-quality SEO practice	Replace with 'Serein Spaces Logo'	MEDIUM	Low	None
Only 1 case study	Decision-makers need multiple comparable project references	Convert top 5–8 portfolio items into full case studies	HIGH	High	Medium
Location pages are thin	Local SEO opportunity not fully exploited	Add city-specific content, projects, and testimonials to each	MEDIUM	Medium	Medium

No WhatsApp above fold	Primary conversion channel (India B2B) not prominent	Add WhatsApp CTA as visible text link above fold	MEDIUM	Medium	Low
Blog meta has boilerplate keywords	Developer placeholder content visible in production	Remove/replace meta keywords tag on blog.php	MEDIUM	Low	None
No FAQ on homepage/service pages	Common questions unanswered create hesitation before enquiry	Add 8–10 FAQ items with FAQPage schema	MEDIUM	High	Low

11. EXECUTIVE SUMMARY — FOR CLIENT PRESENTATION

Prepared for: Himanshu Jain, Serein Spaces

This summary is suitable for sharing directly with the leadership team.

The Situation

Serein Spaces has achieved a strong organic presence for its target keywords in Delhi NCR. The website attracts a meaningful volume of relevant visitors — business owners, founders, and decision-makers searching for commercial interior design services. This is a genuine competitive advantage.

The Problem

Despite good traffic, the website is not converting visitors into enquiries at the rate it should. Our audit identified a clear pattern: the website succeeds at attracting the right people, but fails to give them the information, confidence, and friction-free path they need to take the next step.

Root Causes

Three root causes account for the majority of the conversion gap: (1) No pricing guidance — visitors cannot self-qualify and leave to find a competitor who provides a range. (2) Weak trust signals — testimonials are generic, portfolio lacks project context, and case studies are almost absent. (3) Poor conversion architecture — CTAs are weak, the contact journey has friction, and blog traffic is not funnelled toward enquiry.

The Opportunity

The good news: none of these are traffic problems. The audience is already arriving. The fixes are primarily CRO and content improvements — not expensive SEO campaigns. Based on industry benchmarks, addressing the critical issues identified in this report should increase the enquiry rate from existing traffic by 30–60% within 60–90 days.

Recommended Next Steps

We recommend a phased 90-day engagement: Month 1 focuses on quick wins that can be implemented immediately with no development cost. Month 2 addresses service page depth, case studies, and the lead capture system. Month 3 focuses on authority building, content for commercial intent, and conversion testing. A detailed roadmap with weekly milestones is provided in Section 9.
